

# Last slides: Class questions

- How might malaria differ from some more recent and past cases?
- Does it matter that there are many competing malaria interventions? How would you adjust vaccine policy to take this into account?
- What if an HIV vaccine is only therapeutic?
- How would you structure incentives for pneumococcal vaccine development to encourage long-term affordability?
- What are the implications of the rich and poor world's different needs on vaccine development? Does it depend whether we are considering malaria, pandemic flu, etc.
- How do you adjust policy and funding on account of vaccine efficacy?

# Last slides: Class questions

- What would you do to better prepare for pandemic flu?
- What has GAVI, UNICEF, PAHO, WHO, and others initiatives done right or done wrong? How would you improve policy?
- How do you suggest making some of this more financially sustainable?
- Is it possible to have a dispassionate approach to vaccine policy? What is the role of politics and advocacy?
- What are the negative, as well as positive, effects of all of this vaccine activity? How would you tackle these effects?
- What are the future public health policy challenges in this area?
