Opening remarks: Andrew Farlow, Head of Global Health Initiatives for Oxford in Berlin

Welcome remarks:
Alastair Buchan, Professor of Stroke Medicine, Pro-Vice-Chancellor, University of Oxford, and Founding Director of Oxford in Berlin (welcome on behalf of Oxford, LSHTM, and UK colleagues)
Claudia Langenberg, Professor of Computational Medicine, Berlin Institute of Health at Charité – Universitätsmedizin Berlin Center for Digital Health, and Vice-Academic Director Healthsciences of the Berlin University Alliance (on behalf of Berlin colleagues)

Introduction and welcome to the two Chairs:
Saleem Sayani: Director of the Aga Khan Development Network Digital Health Resource Centre (AKDN dHRC); Director of the Technology Innovation Support Centre at the Aga Khan University; serving on the faculty of the Department of Community Health Sciences at the Aga Khan University. Member of WHO Roster of Experts on Digital Health.
Darlington Akogo: Founder and Director of AI at GUDRA, and its subsidiaries in healthcare, biotech and biomedical research, minoHealth, minoHealth AI Labs; in plant & pest disease detection and precision agriculture, karaAgro AI; in AI and data science training, Runmila AI Institute; in AI and Data Science development, Gudra AI Studio.

Presentation of Framework to Guide the meeting: Saleem Sayani and Darlington Akogo

A few short presentations: A selection of members of the group have been asked to present/speak about their work for approx. 5-7 minutes maximum each.

The above will finish by approx. 1 hour (a bit longer if discussions, and at least one presenter will present/speak in the second hour)

Discussion: Chaired by Saleem Sayani and Darlington Akogo: gaps, needs, possible collaborations. Exploring how those present can work closer together to create a safe, friendly, space for south/north digital health and AI explorations and learning, and strong consortia drawing off multiple institutes that respond well to current priorities and are attractive to funders. Next practical steps (last ten minutes), possibly including:
- Communications/knowledge-sharing platform for group (public and private elements).
- Areas of expertise in the group relatively overlooked this time (to place more emphasis on next time).
- Topics for next group meeting.
- Any proposed sub-groups to explore specific themes.
- Proposed webinar topics (including joint with other groups), as subsidiary activities of the Group.
- Planning and logistics of activities, resource and funding needs and possibilities.
- Prospective dates of next meeting of Global Health Strategy Group for Digital Health and AI.
