

Friday 11 November 2022  
AMR gathering  
14.30-16.00:

RKI; GARDP/WHO; Kemri-Wellcome; University of Oxford;  
Royal Holloway, University of London; LSHTM; Financial Times

Dear colleagues,

We look forward to seeing you tomorrow, Friday 11 November (14.30-16.00 UK time) for our impromptu gathering to explore ways to support each other on a range of forthcoming AMR activities (meeting link, if needed, repasted below).

With several new initiatives kicking off or expanding, the initial notion was of an informal gathering of a few of us to share needs, hear about new activities, and explore possible collaborations. The more we told others, the more popular it got to the point we thought it useful to invite a few others. So, I apologise that some of you got notified quite late, but we thought better to go with the momentum than to fix a later date.

Key 'agenda items' will include: antimicrobial consumption and health care-associated infections, access to antibiotics, antibiotic stewardship and infection control, especially in hospitals, health systems research and implementation research, cross-cutting economics / technology assessment tools, the better use of the growing body of One Health data, impact of climate change on AMR, and improved application of social science tools to AMR. A short summary of action points will be created after the meeting.

The plan continues to be to have a relaxed gathering, a bit like a group of colleagues/friends meeting a Friday at the end of a busy working week. So, no long presentations (maybe a couple of slides if felt strictly necessary and if agreed in the moment) with emphasis on face-to-face conversation. When we finish at 16.00 UK time, some have indicated a desire to hang on longer, so please do feel comfortable bringing something to eat or drink.

I have not run such a big group on my Teams account before; if there is a problem, we will immediately email you our back-up option.

With many thanks to everyone.  
Andrew

Those joining:

**RKI (WHO Collaborating Centre for Antimicrobial Resistance, Consumption and Health Care-Associated Infections)**

Tim Eckmanns  
Sebastian Haller

**GARDP/WHO antibiotic access, including SECURE**

Yann Ferrisse

Jennifer Cohn  
Maarten Van der Heijden

**Access to antibiotics research team**

Andrew Farlow  
Humayra Bashir  
Yuzana Khine Zaw  
Fred McElwee  
Jean-Christophe Spiliotis-Saquet  
Rahim Belal

**Kemri-Wellcome**

Edna Mutua  
Michuki Maina  
Samuel Akech

**Other Oxford:**

Christiane Dolecek  
Katy Thompson  
Koen Pouwels  
Ben Cooper  
Benn Sartorius (joining a little into the meeting)  
Jacob Mcknight (joining maybe later)  
Laurence Roope (hopes to join for some)

**Royal Holloway, University of London:**

Jenni Cole (hopefully all)

**London School of Hygiene and Tropical Medicine**

Clare Chandler (joining for first part)

**Financial Times**

Andrew Jack (will try to join after 15.00)
