

Roundtable get-to-know-each-other-better meeting

17th May 2023

14.30-16.00

Refreshments from 14.00. Please be seated by 14.25

3rd floor of the Rodney Porter building, Department of Biochemistry, OX1 3QU
and some online (Teams Meeting ID: 326 905 800 823, Passcode: qRLsgX)

After brief introductions, a selection of colleagues will give a short outline (of about 2-2.5 mins each) of their work and that of colleagues in the AMR field, a mix of some talking without slides and some using a couple of slides according to their preferences. Every few speakers we will have a 5-minute discussion. The schedule for the day is super tight so we will start spot on 14.30 and end spot on 16.00 and will need to stop speakers mid-thought if going over time. Exact order subject to modification on the day.

The meeting organiser, **Andrew Farlow**, NDM, will chair the meeting and try to keep everyone on time!

1. **Ben Cooper**: DRIaDD (DRUG-Resistant Infections and Disease Dynamics) and related AMR activity.
2. **Proochista Ariana**: ABACUS II and qualitative research outcomes on community behaviours (also on behalf of Taniya Sharmeen).
3. **Cherry Lim**: Studies on hospital-acquired bacterial infection and antimicrobial resistance surveillance in Southeast Asia.
4. **Christiane Dolecek**: The GRAM study and MICROBE.
5. **Koen Pouwels and Larry Roope** (sharing max 5 mins): health-economic evaluations (cost-effectiveness and VOI), both trial and model-based; burden estimation and measuring and explaining inequality; understanding and influencing behaviours of patients and healthcare professionals. Activity of the Health Economic Research Centre (HERC) (also on behalf of Philip Clarke).
7. **Sonia Lewycka/ Phaik Yeong Cheah** (both virtual): The Just Transitions project (also on behalf of Sassy Molyneux and other colleagues).
8. **Sebastian Fuller** (virtual, liaising with Edna Mutua, Michuki Maina and others to possibly share): HIGH-Q AMR activities & diagnostic work.
9. **Jacob Mc Knight**: CINAMR, health systems, and KWTRP KEMRI-Wellcome. Both the previous speakers on behalf a large number of others, especially in Kenya.
10. **Jolyon Harris**: IDDO/ Infectious Diseases Data Observatory: Data Curation and Governance Framework (also on behalf of Philippe Guerin and the IDDO team).
11. **Timothy Peto**: Oxford Biomedical Research Centre.

12. **Humyara Bashir/Fred McElwee/Jean-Christophe Spiliotis-Saquet:** AMR in the community, AMR data and trackers, country research and support, economics/pricing of antibiotics.
13. **Craig Maclean:** Evolutionary aspects of AMR.
14. **Do Thi Thuy Nga:** Results of a very large trial of point-of-care diagnostics to guide antibiotic prescribing in primary care centres in Vietnam.
15. **Susie Dunachie/Victoria Ward:** New vaccines for Gram-negative AMR.
16. **Andrew Farlow:** Access to antibiotics (economic models for GARD/WHO).
17. **Ramanan Laxminarayan:** The One Health approach to tackling AMR.

Others in the meeting will be able to take the floor to share their work if not covered above.

A number of colleagues had clashing engagements (in particular there is a UKRI AMR meeting in Birmingham the same day and several colleagues will be there) and we will endeavour to recognise this extra breadth of work on the day (e.g. a big Medicine Quality Research Group highly engaged in AMR-related activities, Centre for Genomic pathogen Surveillance, etc.)

Problems on the day: Please email Humayra.Bashir@ndm.ox.ac.uk and andrew.farlow@ndm.ox.ac.uk or/and use the chat function in Teams.
